

DAKOTA

Model 90 Tree Transplanter™ - Digs a True 90" Hole

**Work Smarter, Not Harder.
Go Remote!**

The **DAKOTA** Tree Transplanter was manufactured using the latest state-of-the-art technology including CAD, laser cut parts and computerized bending and welding. Designed to be faster, safer and easier to operate, the Transplanter is a low-maintenance, high quality tree spade that digs a true 90" hole and offers standardized replacement parts. Multiple patents pending.

Telescoping Assist Cylinder

Operate from Anywhere
